Dear Sir,

RE: Proposed Bitumen Emulsion Plant in Maddington

I write to you to express my concern over the proposed plant. These concerns can be best summarised by the following:

- **Buffer:** I feel that the proposed plant is much too close to residential homes. The buffer that is specified for asphalt plants (1000 metres) should also apply to this proposal. There are already impacts from the industrial area on homes that are located near the industrial area and I feel that it is unwise to introduce further impacts until the present ones are fixed.
- **Consultation:** I feel that the current level of consultation has been inadequate. The information that has been made available to date has not been suitably detailed or specific enough for people to make an informed decision.
- **Environmental Impacts:** I have concerns over potential environmental impacts that this proposal can have in addition to the environmental impacts that currently exist in the Maddington Industrial Area. I have concerns that the proposal will affect our air quality, that it will cause odour impacts, and that the proposal has the capacity to pollute Bickley Brook through groundwater and stormwater contamination.
- **Similar Proposals:** I have concerns that the proposal may have similar impacts on the community as the asphalt plant in Baldivis. If we know that these plants can affect people living more than 300 metres away, allowing a plant within 100 metres of homes is unacceptable.

This is our community, and we should have a say in what is allowed to enter our community, and I do not think that this proposal is acceptable for our community.

Yours Sincerely,
